

Installation instructions for mobile holder in the rubber clamping ring of the watch case

If necessary, disconnect the car battery and remove the clock from the dashboard and disconnect it.

Lighting

Picture, connecting the clock

Fit the rubber clamping ring into the holder, smearing a little cream on the inside if necessary, so that it slides better over the watch case.

Adjust the position of the holder before pressing in the clock.
Be careful not to place it too close to the dashboard.

**Please attach the metal plate for cell phone above the center,
in the upper area on the outside of the smartphone back!**

The rubber clamping ring requires grooves (see illustration).
If it does not have grooves, you are welcome to purchase it on my website.
